SOFTWARE ENGINEERING PROJECT · FIRST-YEAR ENGINEERING

# Conference Submission System

A Java web application that runs the review process of an academic conference, from submission to decision.

### Accounts and roles

Sign-up, login, and roles per conference: author, reviewer, chair

### Conference setup

Topics, deadlines and programme committee defined by the chair

### Paper submission

Title, abstract, authors and PDF, editable until the deadline

### Reviewer assignment

Papers assigned to reviewers, conflicts of interest checked

### Double-blind review

Scores and comments, identities hidden on both sides

### Decision and notification

Accept or reject, results published to the authors

TOOLS AND TECHNOLOGIES

# A free, well-documented Java stack

### BACKEND

**Java 21**
Core language of the project

**Spring Boot**
Web application framework

**Maven**
Build and dependencies

### INTERFACE

**Thymeleaf**
HTML pages generated by the server

**Bootstrap**
Clean, responsive layout

### DATA AND SECURITY

**PostgreSQL**
Relational database

**Spring Data JPA**
Java objects mapped to tables

**Spring Security**
Login, roles, BCrypt passwords

### QUALITY AND TEAMWORK

**JUnit 5 + Mockito**
Unit and integration tests

**Git + GitHub**
Versioning, work in pairs

**PlantUML**
UML diagrams as text

---

**IDE:** IntelliJ IDEA · All tools are free and open source

**Duration:** 12 weeks
